

**JOHNSON PUMP GROUP**  
AN SPX BRAND

**Declaration of Conformity  
for SPX Flow Technology TopWing and TopLobe pumps  
according to EC Directives 1935/2004 and 2023/2006**

Herewith we as manufacturer and first marketer declare that the pumps including their component parts with food contact comply with the provisions of:

- the Directive 1935/2004/EC for food contact materials
- the Foodstuffs, Consumer Goods and Animal Feed Code (German LFGB)
- the Consumer Goods Ordinance (German BedGgstV)
- the recommendations of the Federal Institute for Risk Assessment (German BfR) for materials in use.

We certify that the processed foodstuffs are not harmfully influenced by the materials used in our pumps if used as intended. They do not emit substances which could be hazardous to health or harmful to foodstuffs.

The material surface of our pumps consists of stainless steel of the material groups 316 (V4A), 304 (V2A), duplex, NGA 88, seals made of EPDM, FPM, ceramic and carbon graphite. The polymer seal materials are FDA – conform.

As food consumer goods they comply with the provisions of Ordinance (EC) 1935/2004.

„Food Grade“ lubricants (e.g. „H1“) approved by us can be used.

The traceability of the pumps with food contact supplied is provided in every respect (Art. 17, Ord. (EC) 1935/2004).

It is certified that we manufacture our products on the basis of Good Manufacturing Practice according to Ordinance (EC) 2023/2006 (GMP Directive) and that our products are marketable within the European Community.
